## MSc (e)-learning course in Haemoglobinopathies

31 Ifigenias, 2007 Strovolos P.O.Box 28807, 2083 Strovolos, Cyprus

E-learning courses provide an opportunity for health professionals to achieve what seemed in previous years an unreachable goal – to obtain a Master's degree while continuing to pursue their normal work and activities at home.

### Programme

The programme offers three academic degrees, part-time or full-time, for health professionals based anywhere in the world:

- MSc, full-time, 1 year / part-time, 2 years
- Diploma, full-time, 8 months / part-time, 16 months
- Certificate, full-time, 4 months / part-time, 8 months

### Tuition Fees / GBP (Great Britain pounds)

Courses	EU Students	Non-EU Students
Full-time MSc Course	4,800	14,500
Part-time MSc Course	2,400	7,250
Full-time Diploma	3,000	9,600
Part-time Diploma	1,500	4,800
Full-time Certificate	1,700	4,800
Part-time Certificate	850	2,400

## MSc in Haemoglobinopathies

A unique opportunity for health professionals from around the world to pursue a specialist qualification from a leading university via distance learning.

Make a difference in your professional life and in the lives of individuals affected by haemoglobin disorders.

With the kind support of the A.G. Leventis Foundation

## Master of Science (MSc) Electronic (e)-learning course in Haemoglobinopathies

A unique opportunity for health professionals from around the world to pursue a specialist qualification from a leading university via distance learning.

University College London (UCL) is part of the University of London. It has a history of 180 years and consistently ranks among the top universities in the UK and globally. UCL has extensive international student and research networks and an excellent reputation in distance and e-learning courses.

**"Our dreams are not in the stars – they are in our minds and in our hearts"**

**Senator J William Fulbright**

The MSc in Haemoglobinopathies is the first e-learning course in this field, developed as a joint venture between UCL and Thalassaemia International Federation. This MSc course, led by internationally recognised experts and taught by distinguished faculties, has been designed to offer health professionals a postgraduate degree from wherever they live without interruption of family or work responsibilities.

Thalassaemia International Federation (TIF) is a patient-driven organisation established in 1986 and working in official relations with WHO since 1996. Today TIF represents the interests of thousands of patients via 98 member associations from over 60 countries worldwide, promoting their rights to a good quality of life and optimal medical and other care.

*Apply now from wherever you are!*

### Course objectives

The aim of this MSc course is to train health professionals in all aspects of the effective control including the prevention and holistic management of haemoglobinopathies – red blood cell disorders that contribute significantly to the global public health burden. This aim is very closely related to **the mission of TIF, which is the promotion of equal access to quality medical care for every patient with a haemoglobin disorder across the world.**

Globally the course aims to:

- ▶ Improve the health and quality of life of patients with thalassaemia, sickle cell disease and other severe haemoglobinopathies by educating international health professionals
  - ▶ Increase awareness and knowledge of effective prevention programmes for haemoglobinopathies
- More specifically, the course focuses on:
- ▶ Offering training on the holistic care of haemoglobinopathies to health professionals practicing in various parts of the world
  - ▶ Bringing together health professionals involved in the field of haemoglobinopathies from a diverse range of disciplines with the ultimate goal of preparing them to deliver innovation in clinical practice, research, education and training

**Gain a Master of Science Degree (MSc) completely online with a prestigious United Kingdom university and achieve career advancement!**

### Who should register?

This MSc course has been designed to advance the knowledge of medical and other health professionals in the field or with an interest to enter the field, including **paediatricians, haematologists, clinical geneticists, primary health physicians, nurses and relevant science graduates.**

**Degrees obtained via e-learning are no different in terms of syllabus, teaching quality and international recognition from degrees obtained under normal full-time enrollment at a university.**

### Admission requirements

- Applicants should have: MD or a university degree in relevant science subjects (BSc, MSc, PhD)
- Health or science professionals who have not obtained their academic qualification from an English-speaking university must satisfactorily pass the IELTS or TOEFL examination, or any other examination from an internationally approved body.
- Basic computer skills

### Why an e-learning course?

- The convenience of classroom accessibility 24 hours a day, seven days a week, from virtually anywhere in the world
- Flexible scheduling and convenience for working professionals
- Save money (pay only for tuition fees) and save time
